

# WALL PANELS

Wall panels or Dado panels are an extremely easy way to create a point of difference in any room. Make a statement in your entry hall, create a period look in your formal lounge or line your stairway or hallway.

The wall panels featured below look fantastic and can be used in so many different ways.

A powder coated finish makes the panels a practical and striking product for use in the kitchen and bathroom.

A fully lined feature wall, back drops, line the front of a bench area, bar etc. The options really are only limited by your imagination.

We recommend that all panels are painted as surface scratches may be present.
